

2006 Annual Riparian-Wetland Report

Field Office: _____

** Read the footnote guidance before
entering data*

Accomplishment Measure		Amount	Accomplishment Description ⁷
Intensive Management reported under EE, EF, EX that benefit Riparian-Wetland Resources ¹	miles (riparian)		
	acres (wetland)		
Treatments Reported under JA, JD, JE, JP, JL, JM that benefit Riparian-Wetland Resources ²	miles (riparian)		
	acres (wetland)		
Projects Reported under JB, JK, JP, JH, JL that benefit Riparian- Wetland Resources ³	number of projects		
	miles (riparian)		
	acres (wetland)		
Maintenance Reported under HC, HB, JI, JC that benefit Riparian- Wetland Resources ⁴	number of projects		
	miles (riparian)		
	acres (wetland)		
Instream Flow Assessments & Studies ⁵ (# Projects)			
Acquisition/Easements ⁶ (# Completed)			
Other (identify measurements)			

1 Intensive Management Applied: Units should be reported when new management actions intended to meet planning objectives and improve functioning and ecological conditions are implemented. Report the miles or acres that were placed under new and more intensive management. If new management is being applied in stages, report the relative proportion of acres or miles that were affected by this year's action. For example, if an allotment was fenced this year to improve 5 miles of riparian area and this is one fifth of the work necessary to eventually meet the desired objectives, then report 1 mile. If the area was fenced and management action implemented this year and no additional action is planned to eventually meet the riparian objectives, then report 5 miles.

2 Do not include amounts reported in MIS under program element JF or JG.

3 Since measure JH only captures the number of projects and not an amount, include the amount of riparian-wetland addressed by the project under program element JH. Do not include the number of projects reported in MIS under program element JH. For program elements JB, JK and JP report both the number of projects and amounts of riparian-wetland addressed by the project.

4 Since measure JI only captures the number of projects maintained and not an amount, include the amount of riparian-wetland maintained under program element JI. Do not include the number of maintenance actions reported in MIS under program element JI. For program elements HC, HB, and JC report both the number of maintenance actions and amounts of riparian-wetland maintained.

5 Those which involve or impact riparian-wetland areas or values. May have been reported as a component of BN.

6 Those which involve or impact riparian-wetland areas or values. May have been reported as a component of EQ or HN.

7 Guidance for describing accomplishments. The description should identify the performance element used to track the accomplishment in the MIS tracking system and very briefly, describe the accomplishment with short narratives outlining the accomplishment, highlighting special projects, cooperative efforts, awards, etc. Example “JA- Pinedale vegetation treatment, 10 acres riparian treated to stimulate grass and shrub production.”
